

## Eastlake Elementary 2026-2027 Land Trust Plan

### **Goal #1**

Eastlake students will show growth in Language Arts. Eastlake Elementary will provide Tier 2 intervention support to ensure student growth of 2% in Acadience reading and RISE.

#### **Measurements:**

Formative and summative unit assessments will measure growth throughout the year. Acadience BOY and MOY will be compared to guide reteaching and intervention efforts and determine the success of achieving the stated goal.

#### **Action Plan Steps and Expenditures:**

1. We will hire Education Support Paraprofessionals (ESP) for reading groups. The ESPs will work with small groups of students to provide structured support in reading.
2. Teachers will collaborate with their grade level teams (PLC) to stay on target with the district pacing guide.
3. Teachers will record and review data and prepare small groups based on assessment data.

### **Goal #2**

Eastlake students will show growth in Math. Eastlake Elementary will implement effective research-based teaching and intervention strategies to assist students in making growth in math on RISE or Acadience Math testing of 3% growth from the previous year.

#### **Measurements:**

Formative and summative unit assessments will measure growth throughout the year. We will compare the beginning and middle of year Acadience Math for grades K-3 to guide reteaching and intervention efforts and determine the success of achieving the stated goal.

#### **Action Plan Steps:**

1. We will hire Educational Support Professionals (ESP) for small group interventions.
2. Teachers will collaborate with their grade level teams (PLC) to stay on target with the district pacing guide.

3. Teachers will record and review data and prepare small groups based on assessment data.

#### Back up plan

1. With remaining funds we will pay for iPads for teachers and aides to do progress monitoring. Progress monitoring helps teachers track student growth and will be able to intervene if not showing growth. Progress monitoring is done online and will need iPads to be able to progress monitor.

2. With remaining funds we will buy more technology for teachers. Teachers need technology in order to create lessons and communicate to parents. Books can be purchased for professional development opportunities. We will be able to do professional development around books that teachers will be able to read and continue to grow in their profession.

#### Expenditures

ESPs=\$145,000

Total funds available: \$145,603.48

Estimate carry-over 603.48
